

MULTI-BW^{RF} controller

6 button remote

RF controller

The RF controller will allow complete control of the Trailer. It will control many functions on the trailer via wireless control.

- Bed tilt up and down via wired or wireless control.
- Winch In/Out
- Auxiliary lights (2 outputs up to 15 amps per output).

Unit operation:

- Buttons on the remote are labeled with Roman numerals 1-6
- Button 1 and 2 will control the trailer tilt feature. Pressing button 1 will raise and button 2 will lower.
- Button 3 and 4 will control winch IN and Out. Button 3 controls winch out and 4 will control winch in.
- Button 5 and 6 are for Auxiliary lighting. Pressing button 5 once will turn the lights on and pressing again will turn lights off. Pressing button 6 will activate the second set of lights in the same manner.

The receiver of the RF unit is housed in a weather tight enclosure and should operate normally in all weather conditions. The remote is water resistant but not submersible. The unit complies with FCC and IC requirements.
