1 General information

1.1 Introduction

This catalogue illustrates the technical specifications for Bucher Hydraulic's D.C. range of Hydraulic Power Units. Designed for compactness and durability, millions of M Series systems have been sold worldwide for actuating mobile, material handling, transport, construction, defense, access, machine tool, ergonomic, and other labor saving devices.

The Bucher Hydraulic name is synonymous with precise and cost efficient designs, robust construction and rapid backup service. For over 150 years the company continues to strive for your confidence by offering personal, reliable service and "Quality Machinery Since 1856" to customers in over 37 countries.

1.2 Mission Statement

Bucher Hydraulics designs, manufactures and delivers innovative fluid power solutions and provides unparalleled support for its customers.

1.3 Quality Policy

Bucher Hydraulics will provide its customers with products and services of continually improving quality to the mutual satisfaction of all parties.

1.4 Bucher Hydraulics Value Statement

- Bucher Hydraulics will be honest, moral and ethical.
- Bucher Hydraulics will accept responsibility for its actions.
- Bucher Hydraulics will treat people with equality.
- Bucher Hydraulics will make a profit.

1.5 Prototype Policy

We invite you to try our prototype program for solutions to Your special hydraulic needs.

While Bucher Hydraulics offers a broad line of hydraulic systems and components, it is impossible to anticipate the needs of every customer, especially those developing new products. Our unique prototype program allows us to respond to your specific needs when an existing "catalogue model" does not fit your application.

To participate in this program, simply submit a print, schematic or sketch of the hydraulic power pack that you need along with a purchase order. We will review the system requirements with you and then manufacture the system that we believe will satisfy your objectives. The unit will be invoiced at an agreed upon price and marked Prototype.

You have 90 days free use of this product for testing an evaluation from the date of invoice. At the end of this period you can (1) extend the testing and evaluation period for an additional 90 days or (2) purchase the unit as invoiced (and order more if needed) or (3) return the unit via prepaid transportation for full credit

There is no risk to you. Just the opportunity to solve your hydraulic problem with the performance and quality of Bucher Hydraulics

ATTENTION!

- Always wear eye protection and protective clothing.
- Remove jewelry and objects that might conduct electricity while working on power units.
- Hydraulic fluid does pose a fire hazard, can cause burning or skin irritation if not properly handled.
- Fluid under pressure can pierce the skin and enter the bloodstream causing death or serious injury.
- Devices being operated by the hydraulic system should be immobilized so they cannot move and cause injury while being inspected or repaired.
Disconnect from electrical source.
- Prior to performing any maintenance make sure the equipment is turned off and that any stored energy, for example pressure, is released. Also, extended equipment or cylinders should be lowered and mechanically locked as required.
- Bucher Hydraulics is not responsible for misuse or misapplication of product. If you have any questions about application, please contact local dealer.
- Fluids should be contained and disposed of properly.

1.6 Features and Benefits

Standard M-3200, M-3300 and M3500 series:

- Wide selection of power unit sizes and performance to satisfy most O.E.M. applications.
- Hardcoated pump end plates for unmatched durability in demanding environments and severe duty applications
- Bucher Hydraulics prototype program: Purchase or return within 90 days of shipment.
- 1 year limited warranty on pump & motor.
- Bucher Hydraulics personal customer service.
- 24 Hour shipment on most parts orders
- Over five million M pumps sold

Options

- Custom motors, valves, reservoirs, control stations and circuits.
- Valve manifolds - remote of mounted directly to the power unit.

2 How to Use This Product Guide

- Select the **Circuit** that will satisfy your design objectives (refer to page 9/110). Contact the factory if you require assistance.
- Select the **Model** that will provide the desired Valve Activation (Manual or Solenoid) listed in the Power System Selection Guide (refer to page 9/110).
- Follow the “**How To Order Your M-3200, M-3300, or S-326 Power System**” provided after each, model description. **Only the most popular combinations are listed for the particular system.** Custom configurations are available and should be discussed with the factory.
- The operating and design characteristics for all of the basic components are listed on pages **51-103** of this guide.

Select Motor on Page 62

Select Reservoir on Page 86-96

Select Valve(s) on Page 97

Select Motor Starting Switch on Page 99

Select Control Boxes on Page 100

Select Mounting Bracket on Page 101

Select Popular Accessories on Page 102

Select Hand Pump on Page 103

- Nominal **Dimensions** are shown for all basic components. Dimensions may be found for your particular system by deleting the component shown on the unit drawing and adding the dimension for the same item you have selected. Note: Dimensions may vary slightly and should be confirmed by the factory if unit is to be installed in space with minimum clearance.
- When selecting a **reservoir**, consideration should be given to dissipating heat, separating air from the oil, and settling out contamination in the oil. There must always be a reserve of oil in the reservoir when all cylinders are fully extended and not overflow when all cylinders are fully retracted. Monarch reservoirs must be vented. Contact the factory for proper reservoir sizing for your application.
- **Motor Thermal Data.** Determine that the motor selected is thermally suited for the “run time” required by consulting the Motor Thermal Performance Data located on page 85

Note: Not all options are available on every D.C. System. Contact the Factory for assistance.

3.36 S-326 Pump/Motor Units

S-326 Units Feature SAE AA and SAE A Pumps and Permanent Magnet Motors.

Permanent magnet motors are typically used to operate hydraulic equipment for material handling devices, aerial platforms, and emergency back-up systems because they provide extended run times and linear pump outputs at various pressures for smooth operation. Pressure loaded pumps deliver high volumetric efficiency and are fitted with spline shafts for optimum engagement with the motor drive shaft.

Please select a motor and pump combination from the following chart and performance curves. Motor thermal data (run time) may be found on page 86.

Part Number	Voltage	Pump Interface	Insulation Class	Dimension Page	Performance Curve	Number of Terminals	Frame	UL Listed	Description *See Key

*Abbreviation Key:
OFC = Open Fan Cooled

A band kit is available that will convert the motor from OFC to EFC (Enclosed Fan Cooled). Use of the band reduces thermal performance. Please contact the factory for more information.

5.24 Motor Thermal Performance Data

Monarch offers a comprehensive line of D.C. motors that will operate from light intermittent through extended duty cycles. It is very important to specify the correct motor for your application.

Most D.C. power units operate intermittently and the thermal heat rise is negligible. However, climate, duty cycle, enclosure and the ambient working temperature must all be considered for proper motor selection.

The following charts show the average allowable operating-times for our most popular D.C. motors. Initially, it is recommended that you determine the amperage required at the peak working pressure of the pump and motor combination selected and then decide if the motor has the required thermal capacity for your duty cycle. Actual field testing should be performed to confirm that the motor is thermally adequate.

Key

A = Amps

T = Single Maximum run time allowed in minutes.

Frequently referred to as S2.

% = Maximum allowable run time for a repeating 10* minutecycle. Frequently referred to as S3. Note. Some motors are rated for a 5 minute cycle and are so noted on the chart.

* = No data available.

Example: 08111 Motor. At 100 Amps the motor may be operated continuously for 9.5 minutes after which it must be allowed to completely cool to ambient temperature before the cycle can be repeated. Alternatively, at 100 Amps the motor may be operated for repeating cycles of 150 seconds on and 450 seconds off.

Thermal protection switches are also available on many models that will protect motors from overheating. Contact factory.

6.10 Valves for DC Systems

NPFA DO3 Directional and Auxiliary Control Valves.

Solenoid directional and auxiliary controls are typically added to the M-3515 and M-3528. Please refer to the Monarch Directional Control Valve brochure for additional information and selection.

Part Number	Schematic	Description
12 VDC - 00962 24 VDC - 00965		4-Way/3-Position. Solenoid Operated. Tandem Center.
12 VDC - 00963 24 VDC - 00966		4-Way/3-Position. Solenoid Operated. Open Center.
12 VDC - 00961 24 VDC - 00964		4-Way/3-Position. Solenoid Operated. Closed Center.
12 VDC - 01040 24 VDC - 01039		4-Way/3-Position, P Blocked. A and B to T. "Motor Spool".
12 VDC - 00460 24 VDC - 00461		4-Way/2-Position. P to A. Spring Offset.
12 VDC - 00460 24 VDC - 00461		4-Way/2-Position. P to A. Spring Offset.
00468		Dual Pilot Operated Check. A and B Port.
00469		Flow Control. Dual Meter Out. A and B Port.
00443		Cross Port Relief. A and B Ports. Adjustable.
00474		Dual Relief. A and B Ports to T. Adjustable.

Consult Bucher Hydraulics about special requirements for explosion proof, shockless (soft shift) and other function and spool configurations not shown here. Other DC as well as AC voltages are available. Functional symbols related to solenoid identity "A" or "B" according to NFPA/ANSI standards, i.e., energizing solenoid "A" gives flow P to A, solenoid "B" gives flow P to B (As Applicable).

Cartridge Valves

Solenoid operated cartridge valves are used in the M-3319 and various other models.

Part Number	Schematic	Description
12 VDC - 00707 24 VDC - 07158		2-Way/2-Position Normally Closed. Modified Cavity #8. Grounded Coil.
07144		2-Way/2-Position Normally Closed. Modified Cavity #8. Manual Operation. Pull to Open. Spring Closed.
12 VDC - 00501 24 VDC - 00502		2-Way/2-Position Normally Open. Modified Cavity #8. Grounded Coil.

Consult Factory about many additional valve voltages, coil terminations and other options.

Manual Valves

Manually Operated Directional Control Valves are used on Models M-3310, M-500 and M-300 Special Units.

Part Number	Schematic	Description
M-3310 Condenser Type - 01020		4-Way/3-Position. Closed Center. Direct Mounting.
M-500 Type - 00853		3-Way/3-Position. Cylinder Port Checked. Direct Mounting.
M-3310 Condenser Type - 00893 M-500 Type - 00856 (Non Condenser Type)		4-Way/3-Position. Tandem Center. Direct Mounting.
M-3310 Cam Start SW - 07120		4-Way/3-Position. Tandem Center. Direct Mounting.

01434	Pressure Gauge. Liquid Filled. 1/4" NPT. 0-3000 PSI.
01790	Pressure Gauge. Liquid Filled. 1/4" NPT. 0-5000 PSI.
00570	Gauge Shutoff. 1/4" NPT.
00904	Flow Control, Adjustable. Non Pressure Compensated. 1/4" NPT. F x F For Flows to 3.0 GPM (11.4 LPM).
01720-X.XX	Flow Control, Pressure Compensated. Fixed. 1/4" NPT F x F. Other Types Available. Specify Flow Required.
01875	Filter, Return Line. 15 GPM. 10 Micron Nominal.
04369	Filter, Return Line. 5 GPM. 10 Micron Nominal.
01425	Filter/Breather, Chrome Plated. Basket Strainer.
04202	M-310 Cam Start Switch Conversion Kit.
07157	Relief Valve, Cartridge. 1500-3000 PSI. Other Pressure Ranges Also Available.
01506	Terminal Cover, Rubber. #4 Cable.
03981	Hand Pump, Standard.
03987	Hand Pump, Mini Direct, Right Hand. High Pressure - Low Displacement.
03943	Hand Pump, Mini Direct, Left Hand. High Pressure - Low Displacement.
07435	Hand Pump, High Pressure - Heavy Duty.
03695	Valve Cover Cap Kit, M-693.

Other Available Options and Accessories Include:

- Float Switches
- Special Manifold Circuits
- Pressure Switches
- Multi-Function Valve Controls - Monoblock and Sectional
- Special Cartridge, Industrial and Manual Valve Configurations.

NOTE: Accessories Will Not Fit Every Model. Please Contact the Factory For Assistance.

6.15 Monarch Hand Pumps

Standard - Standard Displacement (0.50 In³/Stroke) High Pressure - Low Displacement (0.25 In³/Stroke) High Pressure/
Heavy Duty - Standard Displacement (0.50 In³/Stroke)

Note: It is recommended that pins and piston be periodically lubricated to prolong hand pump life.

6.16 Standard Hand Pumps

Description

- 0.50 In³/Stroke (8.20 Cm³/Stroke)
- Single Acting
- 2000 PSI (138 Bar)
- Outlet Port: 1/4" NPTF
- Ideal For Emergency Back-Up Application in Case of Primary Pump Failure
- Horizontal or Vertical Mounting
- Designed for Mounting Directly to Monarch Power Units
- Handle May Positioned in any Direction
- Release Valve (Use Handle for Actuating)
- Supplied with Painted Steel "Comfort Grip" Handle
- All Exposed Materials are Aluminum or Plated Steel for Corrosion Resistance

Popular Options

- Remote Mounting
- Ports. Other Styles Available
- Relief Valve
- Integral Reservoir

6.21 Battery Cables

- For best results, Monarch would recommend that you increase 1 or 2 cable sizes above the minimum shown above. Select cable size so that your cable length and maximum amp draw falls below and to the left of curve.
- Curve describes a 1 volt loss in the battery cable itself.
- Total length of battery cable(s) including all ground cables.

Example: With maximum current draw of 200 amps and total cable length of 28 ft (7.82m), Select #1 gauge (.28 in/7.1mm) or larger.

6.22 Limited 1 Year Warranty

Bucher Hydraulics, Inc. ("Bucher") makes the following warranty to any party who purchases this Bucher Hydraulics, Inc. product directly from Bucher Hydraulics, Inc. with the intention of either reselling this Bucher Hydraulics, Inc. product or incorporating it into or attaching it to some other product ("the purchaser").

Bucher Hydraulics, Inc. warrants to the purchaser that this product is free from any substantial defects in materials and workmanship. If this product proves to be defective in materials or workmanship during the period of this warranty, Bucher Hydraulics, Inc. will repair or replace, at its option, the defective product free of charge (except for transportation charges as provided below). The period of this warranty is the (1) year period beginning from the date of shipment of this Bucher Hydraulics, Inc. product by Bucher Hydraulics, Inc. to the purchaser.

To obtain warranty service, the purchaser must call Bucher Hydraulics, Inc. to have a return goods authorization number assigned to them. The purchaser should then send the product claimed to be defective within the warranty period, transportation prepaid, to: Bucher Hydraulics, Inc., 1363 Michigan Street N.E., Grand Rapids, MI. 49503, USA. Bucher Hydraulics, Inc. will then repair or replace, at its option, items which it finds to have been defective. Bucher Hydraulics, Inc. will return such repaired or replacement items to the sender free of charge. Items claimed by the purchaser, but not found by Bucher Hydraulics, Inc., to be defective will be returned to the purchaser by a reasonably expeditious means at the purchaser's expense. This expense may include labor charges incurred from inspecting the unit.
